INDUSTRIAL METHYLATED SPIRITS
SAFETY DATA SHEET

MSDS No: QUICK SMART PRODUCTS
Product Name: INDUSTRIAL METHYLATED SPIRITS
Manufacturers Code: IMS1, IMS5, IMS20, IMS200
Date: September 2020

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name: INDUSTRIAL METHYLATED SPIRITS
Company Name: QUICK SMART PRODUCTS
Address: 53 Assembly Drive
           Tullamarine  Vic  3043
Telephone/Fax: (03) 9338 6655 (BH)  Poisons Information Centre 131126 (AH)  (03) 9336 7945 (AH)
Recommended Use: General Industrial Solvent

2. HAZARDS IDENTIFICATION

Hazard Classification  This material is hazardous according to criteria of Safe Work Australia.

GHS Classification(s)  Flammable Liquids: Category 2
                      Serious Eye Damage/Irritation: Category 2A

GHS Label Elements
Signal Word  DANGER
Symbol(s)

Hazard Statements
H225  Highly flammable liquid and vapour
H319  Causes serious eye irritation

Precautionary Statements
General
P102  Keep out of reach of children.
P103  Read label before use.

Prevention
P210  Keep away from heat/sparks/open flames/hot surfaces. - No Smoking.
P233  Keep container tightly closed.
P240  Ground/bond container and receiving equipment.
P241  Use explosion-proof electrical, ventilating, lighting and all other equipment.
P242  Use only non-sparking tools.
P243  Take precautionary measures against static discharge.
P264  Wash hands, face and all exposed skin thoroughly after handling.
P280  Wear protective clothing, gloves, eye/face protection and suitable respirator.
INDUSTRIAL METHYLATED SPIRITS
SAFETY DATA SHEET

MSDS No:
Product Name: INDUSTRIAL METHYLATED SPIRITS
Manufacturers Code: IMS1, IMS5, IMS20, IMS200
Date: September 2020

QUICK SMART PRODUCTS
53 ASSEMBLY DRIVE
TULLAMARINE, VIC 3043
Ph: (03) 9338 6655 (BH) Fax: (03) 9335 2598
Email: qsmart@bigpond.net.au
Web: www.quicksmartproducts.com.au

Response
P101 If medical advice is needed, have product container or label at hand.
P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313 If eye irritation persists: Get medical advice/attention.
P370+P378 In case of fire: Use alcohol resistant foam, standard foam or dry agent for extinction.

Storage
P403+P235 Store in a well ventilated place. Keep cool.

Disposal
P501 Dispose of contents/container in accordance with local, regional, national and international regulations.

Poisons Schedule (Aust)
Not applicable.

3. COMPOSITION/INFORMATION ON INGREDIENTS

<table>
<thead>
<tr>
<th>Chemical Entity</th>
<th>CAS No</th>
<th>Proportion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ethanol</td>
<td>64-17-5</td>
<td>95-100%v/v</td>
</tr>
<tr>
<td>Methyl isobutyl ketone</td>
<td>108-10-1</td>
<td>0.25%v/v</td>
</tr>
<tr>
<td>Denatonium benzoate</td>
<td>3734-33-6</td>
<td>6.6ppm</td>
</tr>
</tbody>
</table>

4. FIRST AID MEASURES

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 131 126, New Zealand 088 764 766)

Description of necessary measures according to routes of exposure

Inhalation
Remove victim from exposure - avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. If breathing laboured and patient cyanotic (blue), ensure airways are clear and have a qualified person give oxygen through a facemask. If breathing has stopped apply artificial respiration at once. In the event of cardiac arrest, apply external cardiac massage. Seek immediate medical advice.

Skin Contact
For gross contamination, immediately drench with water and remove clothing. Continue to flush skin and hair with plenty of water. For skin burns, cover with a clean, dry dressing until medical help is available. If blistering occurs, do NOT break blisters. If swelling, redness, blistering, or irritation occurs seek medical assistance.

Eye Contact
If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing until advised to stop by the Poisons Information Centre or a Doctor; or for at least 15 minutes and transport to Doctor or Hospital.

Ingestion
Rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water to drink. Never give anything by the mouth to an unconscious patient. If vomiting occurs give further water. Seek medical advice.

First Aid Facilities
Potable water should be available to rinse eyes or skin. Provide eye baths and safety showers.
PPE for First Aiders
Wear overalls, chemical goggles and impervious gloves. Use with adequate ventilation. If inhalation risk exists wear organic vapour/particulate respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716. Available information suggests that gloves made from nitrile rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.

Advice to Doctor
Treat symptomatically.

5. FIRE FIGHTING MEASURES

General Measures
Do not enter enclosed or a confined work space without proper protective equipment. Fire fighting personnel should wear respiratory protection (positive pressure if available). Clear fire area of all non-emergency personnel. Stay upwind. Keep out of low areas. Eliminate ignition sources. Move fire exposed containers from fire area if it can be done without risk.

Suitable Extinguishing Media
If material is involved in a fire use alcohol resistant foam, water fog (or if unavailable fine water spray), foam or dry agent (carbon dioxide, dry chemical powder).

Specific Hazards
Flammable liquid. May form flammable vapour mixtures with air. Flameproof equipment necessary in area where this chemical is being used. Nearby equipment must be earthed. Electrical requirements for work area should be assessed according to AS3000. Vapour may travel a considerable distance to source of ignition and flash back. Avoid all ignition sources. All potential sources of ignition (open flames, pilot lights, furnaces, spark producing switches and electrical equipment etc) must be eliminated both in and near the work area. Do NOT smoke.

Fire Fighting Further Advice
If safe to do so, remove containers from path of fire. Keep containers cool with water spray. On burning may emit toxic fumes, including those of carbon dioxide and carbon monoxide. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or products of combustion.

Hazchem Code
●2YE

6. ACCIDENTAL RELEASE MEASURES:

Emergency Procedure
Shut off all possible sources of ignition. Clear area of all unprotected personnel. Slippery when spilt. Avoid accidents, clean up immediately. Wear protective equipment to prevent skin and eye contamination and the inhalation of dust or vapours. Work up wind or increase ventilation.

Containment Procedure
If safe to do so, isolate the leak. Small spills are allowed to evaporate provided there is adequate ventilation. Contain - prevent run off into drains and waterways. If contamination of sewers or waterways has occurred advise local emergency services.

Clean Up Procedure
Cover with damp absorbent (inert material, sand or soil). Collect and seal in properly labelled containers or drums for disposal. Use a spark-free shovel.

Dangerous Goods
Initial Emergency Response Guide No: 14
7. HANDLING AND STORAGE

Handling  Avoid skin and eye contact and inhalation of vapour, mist or aerosols.
Storage  Store in a cool, dry, well-ventilated place and out of direct sunlight. Store away from foodstuffs. Store away from incompatible materials described in Section 10. Store away from sources of heat or ignition. Keep containers closed when not in use - check regularly for leaks.

This material is classified as a Dangerous Good Class 3 Flammable Liquid as per the criteria of the Australian Dangerous Goods Code and must be stored in accordance with the relevant regulations.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

National Occupational Exposure Limits: No value assigned for this specific material by Safe Work Australia. However for:

<table>
<thead>
<tr>
<th></th>
<th>TWA (ppm)</th>
<th>STEL (mg/m³)</th>
<th>Carcinogen Category</th>
<th>Notices</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ethanol</td>
<td>1000</td>
<td>1880</td>
<td>-</td>
<td>-</td>
</tr>
</tbody>
</table>

As published by Safe Work Australia.

TWA - The time-weighted average airborne concentration over an eight-hour working day, for a five-day working week over an entire working life.

These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

If the directions for use on the product label are followed, exposure of individuals using the product should not exceed the above standard. The standard was created for workers who are routinely, potentially exposed during product manufacture.

Biological Limit Values  As per the “National Model Regulations for the Control of Workplace Hazardous Substances (Safe Work Australia)” the ingredients in this material do not have a Biological Limit Allocated.

Engineering Measures  Ensure ventilation is adequate to maintain air concentrations below Exposure Standards. Use only in well ventilated areas. Use with local exhaust ventilation or while wearing appropriate respirator. Vapour heavier than air - prevent concentration in hollows or sumps. DO NOT enter confined spaces where vapour may have collected. Keep containers closed when not in use.

Personal Protection Equipment  Overalls, safety shoes, chemical goggles, gloves, respirator.

Wear overalls, chemical goggles and impervious gloves. Use with adequate ventilation. If inhalation risk exists wear organic vapour/particulate respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.

Available information suggests that gloves made from butyl rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.
Hygiene Measures
Keep away from food, drink and animal feeding stuffs. When using do not eat, drink or smoke. Wash hands prior to eating, drinking or smoking. Avoid skin and eye contact and inhalation of vapour, mist or aerosols. Ensure that eyewash stations and safety showers are close to the workstation location.

11. TOXICOLOGICAL INFORMATION

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms and effects that may arise if the product is mishandled and overexposure occurs are:

Acute Effects

Inhalation Material may be an irritant to mucous membranes and respiratory tract.

Skin Contact Contact with skin may result in irritation. Will have a degreasing action on the skin. Repeated or prolonged skin contact may lead to irritant contact dermatitis.

Ingestion Swallowing can result in nausea, vomiting and irritation of the gastrointestinal tract.

Eye Contact An eye irritant.

Acute Toxicity

Inhalation This material has been classified as non-hazardous. Acute toxicity estimate (based on ingredients): >20 mg/L

Skin Contact This material has been classified as non-hazardous. Acute toxicity estimate (based on ingredients): >2,000 mg/L

Ingestion This material has been classified as non-hazardous. Acute toxicity estimate (based on ingredients): >2,000 mg/L

Corrosion/Irritancy Eye: This material has been classified as a Category 2A Hazard (reversible effects to eyes). Skin: This material has been classified as no corrosive or irritating to skin.

Sensitisation Inhalation: This material has been classified as not a respiratory sensitisier. Skin: This material has been classified as not a skin sensitisier.

Aspiration Hazard This material has been classified as non-hazardous.

Specific Target Organ Toxicity (Single Exposure) This material has been classified as non-hazardous.

Chronic Toxicity

Mutagenicity This material has been classified as non-hazardous.

Carcinogenicity This material has been classified as non-hazardous.

Reproductive Toxicity (including via lactation) This material has been classified as non-hazardous.

Specific Target Organ Toxicity (Repeat Exposure) This material has been classified as non-hazardous.

12. ECOLOGICAL INFORMATION

Avoid contaminating waterways.

Acute Aquatic Hazard This material has been classified as non-hazardous. Acute toxicity estimate (based on ingredients): >100 mg/L

Long Term Aquatic Hazard This material has been classified as non-hazardous. Chronic toxicity estimate (based on ingredients): >100 mg/L

Ecotoxicity
No information available.

Persistence and Degradability
Readily biodegradable.

Bioaccumulative Potential
In information available.

Mobility
No information available.

13. DISPOSAL CONSIDERATIONS
Persons conducting disposal, recycling or reclamation activities should ensure that appropriate personal protection equipment is used, see “Section 8. Exposure Controls and Personal Protection” of this SDS. If possible material and its container should be recycled. If material or container cannot be recycled, dispose in accordance with local, regional, national and international Regulations.

14. TRANSPORT INFORMATION

ROAD AND RAIL TRANSPORT
Classified as Dangerous Goods by the criteria of the “Australian Code for the Transport of Dangerous Goods by Road and Rail” and the “New Zealand NZS5433: Transport of Dangerous Goods on Land”.

Proper Shipping Name ETHANOL
UN number 1170
DG Class 3 Flammable Liquid
Packaging Group II
Hazchem Code •2YE
Emergency Response Guide No. 14

Segregation Dangerous Goods
Not to be loaded with explosives (Class 1), flammable gases (Class 2.1), if both are in bulk, toxic gases (Class 2.3), spontaneously combustible substance (Class 4.2), oxidising agents (Class 5.1), organic peroxides (Class 5.2) or radioactive substances (Class 7), however exemptions may apply.

MARINE TRANSPORT
Classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.

Proper Shipping Name ETHANOL
UN number 1170
DG Class 3 Flammable Liquid
Packaging Group II
**AIR TRANSPORT**

Classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

<table>
<thead>

- UEL: Upper Explosion Limit
This SDS summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user must review this SDS in the context of how the product will be handled in the workplace and in conjunction with other materials. It is the user’s obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The Company accepts no responsibility for any injury, loss or damage, resulting from abnormal use of the material or from any failure to adhere to recommendations. If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact this company.

END OF SDS
